

Sorting and Containment

Panic Situation

When situations occur necessitating containments do not panic — we can help you quickly to limit your exposure to losses and help you meet buyer commitments with our quality NDT sorting capabilities.

TÜVRheinland® is here to help you when every minute counts.

- Very responsive 24 hours a day 365 days a year availability
- Expedited service
- High speed mobilizations onsite at customer locations, the point of entry or at one of our lab locations
- Advanced technology inspection capabilities — with the result of better sorting with higher accuracy and quality
- High speed sorting line capabilities
- More detailed orientated than other providers

- Non destructive inspection methods to maximize salvage products
- Highly trained technicians

Service Offerings Include:

Non-Destructive testing methodologies include Real Time, Computed, and Film Radiography, Eddy Current, Hardness Sorting, Material Sorting (PMI), Magnetic Particle, Ultrasonic (including Phased Array), Liquid Penetrate, and Visual Inspection by qualified personnel.

Our Customers Are Satisfied

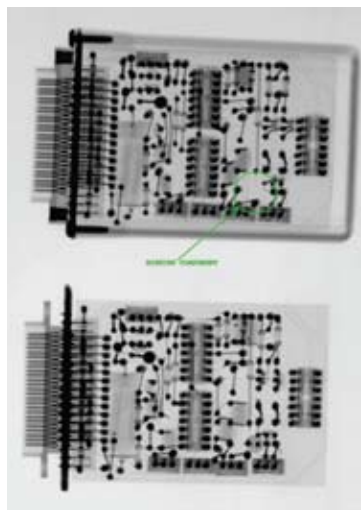

My small chemical and materials testing laboratory was asked to test 1.25in re-bar that was well beyond our testing capabilities. The customer was interested in having me find the solution for him. After looking at other labs, I was finally successful

with that quest. The experience was very positive and produced results that met our customer's requirements. I look forward to having the opportunity to work with NDT again.

— Anthony Corvelli
FAI Materials Testing Laboratory

CEC Inc. appreciates help with past and present projects like Ambridge High School, MEDRAD and Rivers Casino from Non Destructive Testing Services. I would like to commend your field staff on their work ethic while being a representative of our company onsite. I also appreciate very efficient customer service, especially with reports and responding to questions. CEC Inc is looking forward to using your company again on future projects.
