

CHECKLIST – GS MARK

In order to assist you in getting the GS mark for your products, we have compiled the following checklist. It illustrates what documents you will need before and during testing. The exact date for the submissions of documents will be agreed upon in consultation with you. Please note that failure to fill out forms or missing documents may result in delays or additional expenses.

Required documents

- Written request for testing

For testing, we need the following documents (preferably in PDF format)

- Instructional manual
- Service/installation instructions
- For certification: Bill of Material (BoM) with material information
- For certification: design drawings
- List of safety-relevant components
- Certificates/data sheets associated with safety-relevant components
- Material detection (dyes, LFBG, plastics, wood)
- Flammability of plastics used
- For certification: Sample Declaration of Conformity
- Declaration of Conformity/test certificate EMC directive
- Declaration of Conformity/test certificate electromagnetic field

For requested certification, we require the following documents

- Material proof – polycyclic aromatic hydrocarbons (PAHs)

For testing, the following requirements apply to samples

- Original name plate/markings on the product
- Fully functional testing exemplar (number of pieces according to the offer)

About TÜV Rheinland

Founded more than 140 years ago, TÜV Rheinland is a global leader in independent inspection services, ensuring quality and safety for people, the environment, and technology in nearly all aspects of life.

We inspect technical equipment, products and services, oversee projects and help to shape processes for companies around the world. Since 2006, we have been a member of the United Nations Global Compact to promote sustainability and combat corruption.

Always a good sign. The TÜV Rheinland test mark.

This mark stands for all the relevant customer information about products, services and systems that are tested, certified or inspected by TÜV Rheinland. This information is available online anytime, anywhere, and can be viewed in a matter of seconds at the click of a button. This means optimal transparency and top performance in terms of safety, quality and reliability – always. Global, systematic and eye-catching – communicated through a unique and multi-functional mark. The TÜV Rheinland test mark.
