Precisely Right.

CUSTOMER REQUEST FOR CERTIFICATION

When you contact us with regards to gaining Certification for your system our sales team will send you the appropriate application form.

APPLICATION

The application includes all the necessary information required for us to issue a quotation, this often includes company details, Overview of client and its management systems, expected scope, other certificates etc.

APPLICATION REVIEW

Once completed the application is reviewed by the certification body to ensure sufficient information is included, the certification is correct for the system, and that it is within our scope and expertise. A quote is then issued.

ASSESSMENT

Once the quote is accepted and if you have chosen TUV Rheinland to carry out your Assessment, our experts will assess your product in line with the agreed test plan. Alternately you may submit reports from other sources.

TECHNICAL REVIEW

The reviewer will review the evaluation reports and other documentation provided against the Essential Requirements of the regulations. The reviewer will then either recommend for or against certification based on findings.

CERTIFICATION DECISION

If certification is recommended by the reviewer a Certifier will carry out some additional checks and make the final decision.

END

Upon a positive certification decision from the Certifier, the certificate is generated. Both a hard copy and soft copy will be sent to you and an entry in our online certificate database will be created www.certipedia.com.

If at any stage in the process there is an issue that would prevent the final certification you will be sent the details and we can discuss further options available to you.

Products covered by this scheme

Simple pressure vessels and components

Cyclic loading / time dependant material

Cyclic loading / time dependant material

Element, Fatigue, and Life Assessment

General Pressure Equipment / Other

If you require any other PESR products not covered in the above list, please contact us to discuss your requirements.

Impartiality

The top management of TUV Rheinland UK Ltd is committed to maintain impartiality in Top management of TUV Rheinland UK Ltd is committed to maintain impartiality in all our services and makes the following Declaration of Impartiality:

Employees who evaluate products or management systems for certification purposes must not engage in consultati-on or technical advice for them. Accreditation standards apply strict prohibitions, e.g.; in case products are tested by bodies (clients or agents representing clients) who have been involved with design, manufacturing or sale of these products.

In order to safeguard our professional reputation, we expect our employees and external personnel to act ethically and impartially in the long-term interest of our company and society. We require personnel, internal and external,

to reveal any situation known to them that may expose them or our company to conflict of interest. TUV Rheinland UK Ltd shall use this information to identify threats to impartiality raised by the activities of such personnel or by the organizations that employ them. We shall not use personnel, internal or external, or buy products / services from direct clients, until we can demonstrate that the risks or threats to impartiality (see below) are reduced to an acceptable level.

The conformist assessment body of TUV Rheinland UK is funded solely by the fees charged for TUV Rheinland services.

More information relating to our impartiality policy is available on request, our terms and conditions relating to testing and certification are available for download here.
