AlarmKPI Package Info

Modern industrial environments rely heavily on effective alarm management systems to ensure operational safety, efficiency and compliance with regulatory standards. **AlarmKPI** is designed to help organisations monitor, assess and enhance their alarm systems using a structured and expert-supported approach.

To cater to diverse business needs, we offer flexible subscription packages that include essential tools, professional services and ongoing support. Each package is tailored to provide varying levels of assistance and expertise, ensuring that you have the right level of support for your alarm management goals.

From foundational features in our Bronze package to advanced alarm performance assessments in our Gold offering, AlarmKPI provides organisations with a comprehensive solution for optimising their alarm systems.

This information sheet outlines the details of each package, so you can select the appropriate solution for your needs. All our packages include set-up and consultant assistance during initial implementation to ensure a smooth transition and quick utilisation of **AlarmKPI's** benefits.
