

## Further training of professors at SENA in Bogotá.

The National Training Service (SENA) is a public institute in Colombia that provides trainings for students of technical, technological and complementary careers. The aim of the government initiative is to enhance the economic, technological and social development and to increase the employment figures.

### Data and facts

Client	Servicio Nacional de Aprendizaje (SENA)
Period	Since April 2017 – ongoing
Site	Bogotá (Colombia)
Services	Further training of SENA professors

## INITIAL SITUATION AND REQUIREMENTS

The state-run SENA promotes economic, technological, and social development in Colombia through free training courses with the aim of strengthening the country's international attractiveness and competitiveness. To this end, the SENA lecturers were to be made familiar with the internationally recognized standards in the areas of quality, occupational health and safety, environmental protection, and the handling of technologies. TÜV Rheinland was selected to ensure this within the framework of a "Train the Trainer" concept.

## SOLUTIONS, RESULTS

Right from the start, it was important for the training courses to include both theoretical and practical elements to provide the lecturers with up-to-date information and to offer the possibility of international certification. Because the focus of the SENA initiative lies on improving the prospects of its graduates on the job market. Highly-qualified lecturers are required for this. TÜV Rheinland Academy is active here as the trainer of the lecturers in order to familiarize them with the requirements of the relevant ISO standards ISO 9001, ISO 14001 & OHSAS, and the technical regulations.

### YOUR BENEFITS

TÜV Rheinland Academy seminars provide up-to-date specialist knowledge around the world and can be adapted flexibly in terms of content and scope. Our lecturers come from real-life practice. They are familiar with the current challenges and solutions in various industries and are specialized in imparting their expertise in an exciting way. In this way, we reliably take key personnel to the next level and secure a decisive competitive advantage for companies. It is also possible to obtain certification according to international standards following the respective training.

### DID YOU KNOW...?

During its 50 years of existence, SENA has established itself as one of the most important centers for technical and technological training in Latin America. The programs which are offered cover the following areas: administration, agriculture, architecture, construction, design, electricity and electronics, mechanics, and technology. They are offered in 116 training centers, which are supervised by around 18,000 teachers.
