

IT trainings for specialists and global users.

The building material manufacturer CEMEX plans to switch its existing IT over to MS OFFICE 365®. Therefor TÜV Rheinland Academy is providing training and support. The migration project is being undertaken worldwide.

Data and facts

Client	CEMEX ESPAÑA
Period	October 2018 – ongoing
Site	Madrid
Services	Training for specialists and global users.

INITIAL SITUATION AND REQUIREMENTS

If a large company changes its IT environment worldwide in a short period of time, this requires the provision of intensive training for its staff. Against this background, TÜV Rheinland Academy provided training and support for technicians and users. The assignment also included consulting and development of departmental applications for Office 365®. The biggest challenge during the implementation was the organization of the learning groups, as at least 250 participants migrated at the same time, but some of them were spread all over Spain.

SOLUTIONS, RESULTS

Experts from TÜV Rheinland Academy accompanied the IT migration with comprehensive consulting and the development of individual solutions for individual departments. Since employees are not always open to change processes, intensive support during such company steps is of particular importance. In the course of the migration, we not only facilitate the use and adaptation of new technologies, but also provided tips on automated data analysis and processing, which makes the entire company able to work in a more efficient and agile manner.

YOUR BENEFITS

TÜV Rheinland Academy seminars provide up-to-date specialist knowledge around the world and can be adapted flexibly in terms of content and scope. Our lecturers come from real-life practice. They are familiar with the current challenges and solutions in various industries and are specialized in imparting their expertise in an exciting way. In this way, we reliably take key personnel to the next level and secure a decisive competitive advantage for companies. It is also possible to obtain certification according to international standards following the respective training.

DID YOU KNOW...?

CEMEX was founded in Mexico in 1906 and is today the third-largest cement manufacturer in the world. The company employs approximately 44,000 people worldwide. The company operates its own app, CEMEX Go, which provides customers with information on orders, deliveries and transactions. This makes CEMEX one of the pioneers of digital transformation in the building materials industry.

ABOUT TÜV RHEINLAND ACADEMY
