

Training as a TÜV-certified instructor.

The German Society for International Cooperation (GIZ) supports Tunisia in setting up local training structures. Instructors for photovoltaic installations have been trained and certified on site as part of this.

Data and facts

Client	GIZ
Period	February 2018 – April 2018
Site	Tunisia
Services	Training of specialist personnel

INITIAL SITUATION AND REQUIREMENTS

GIZ GmbH has been working in Tunisia since 1975. Its tasks include supporting the state in its economic and democratic development, and promoting training structures. In this context, TÜV Rheinland Academy was commissioned to train 17 people to become TÜV-certified trainers for photovoltaic installations. The decision in favor of TÜV Rheinland Academy was based on the possibility of neutral certification, the high quality of the training, and the positive experience from past projects.

SOLUTIONS, RESULTS

The training of the instructors included the areas of designing and preparing a training module, training assessment, knowledge assessment, and implementation of training. In addition, the participants received training on topics such as the psychology of learning for adults, presenting and moderating, and the use of teaching media. Group-dynamic processes and coping with difficult training situations were also part of the training. The final module was on quality assurance in adult education.

YOUR BENEFITS

TÜV Rheinland Academy seminars provide up-to-date specialist knowledge around the world and can be adapted flexibly in terms of content and scope. Our lecturers come from real-life practice. They are familiar with the current challenges and solutions in various industries and are specialized in imparting their expertise in an exciting way. In this way, we reliably take key personnel to the next level and secure a decisive competitive advantage for companies. It is also possible to obtain certification according to international standards following the respective training.

DID YOU KNOW...?

Together with its partners, GIZ is currently working on more than 45 projects in Tunisia. Thanks to its parliamentary democracy, the country is regarded as one of the region's hopeful prospects. However, a lack of vocational qualifications and the unemployment associated with this threaten the country's stability. Economic development and employment promotion are therefore two of the GIZ's priorities. In addition, specific support is provided to develop the renewable energy and energy efficiency sector.

ABOUT TÜV RHEINLAND ACADEMY

With branches all over the world, TÜV Rheinland Academy is the international institution for technical and professional expertise in all important subject areas. We convey well-founded knowledge from real-life practice. Our innovative further training solutions range from individual training courses to customized personnel development concepts. In this way, we strengthen the technical skills of participants all over the world. We are proud of the fact that numerous renowned customers worldwide decided upon our recognized training and certification courses. Use the expertise of your employees – confirmed by the certification – as a competitive advantage now, because this proof of competence increases confidence in your services.
