

Individual courses for unique success.

Jane thought computers and technology were the best, even as a child. First, she played with her Game Boy for days, later it became a computer. She quickly found friends in the gaming community but, when hackers paralyzed her account, she also became acquainted with the dark side of networking.

THE DREAM

In her “digital playground” between Game Boy and computer programs, Jane had already enjoyed training her skills and expressing her creativity at a young age. After becoming the victim of a hacker during her curious advances, she was keen to prevent this from happening to her a second time. With skill and creativity, it should be possible to solve this challenge. Jane also took this awareness into her job. From the very beginning, she wanted to protect her company as far as possible from the dangers of the Internet.

However, studying computer science was out of question for her. This would have taken too long and had too little practical relevance. In addition, Jane wanted to set her own priorities and have the opportunity to learn when she had time – without having to go to an auditorium.

THE SOLUTION

The live online training courses at TÜV Rheinland Academy were just right for her. It was possible to adapt the content on the subject of data protection exactly to the requirements of her company. A course with web-based training and a serious game was thus recommended to Jane and her colleagues.

This gave her easy and convenient access to all the expertise she was looking for. Interactive learning models allowed Jane to try out different approaches until she came up with the right solution herself. The best part was that she could immediately see her learning success and memorize the material permanently.

YOUR BENEFITS

Learning success is improved by a high degree of personal activity because people remember 90 % of what they do themselves. TÜV Rheinland Academy’s digital learning services offer a time-efficient and economically scalable solution for continuing education in the modern world of work: You decide on the right format. With around 20 years of project experience, we implement the development and support you in evaluating your learning progress. We provide ultimate assurance through independent personnel certification.

SUMMARY

The individually developed online training not only benefits Jane, but also her colleagues at other locations. Together, they have trained in cyber security and are now in a position to make their company’s online business much safer.

Since the strategies and methods of hackers are constantly evolving, this will certainly not be their last course.

ABOUT TÜV RHEINLAND ACADEMY

In times of emerging markets and increasing demand for skilled workers, technical expertise requires a reliable companion. With branches all over the world, TÜV Rheinland Academy is the international institution for technical and professional expertise in all important subject areas. We impart and verify specialist knowledge in precisely the right way. Our innovative training solutions range from individual training courses to customized personnel development concepts. In this way, we comprehensively strengthen the technical skills of participants all over the world.
