

New teaching methods with up-to-date information.

From an early age, Sophia always wanted to find out how things work: pin toys, marble runs, her first Lego robot – anything that somehow had to do with technology fascinated her.

Precisely Right.

THE DREAM

Sophia began to consider what would be possible with modern technology: how far artificial intelligence can be developed, where its limits are, and how it can contribute to shifting these limits.

She soon noticed that it is a long path to the top of IT research and that it requires a solid education. Thus, Sophia began to use the e-learning courses of TÜV Rheinland Academy in addition to her normal education, where she learned the basics of all the Office programs, among other things. A good basis that she can still make use of for calculations and presentations today.

THE SOLUTION

Through her basic seminars, Sophia also discovered the advanced courses in information technology. The expertise that she gained in these courses gave her the confidence she needed to create her own start-up. Together with two friends, she now develops applications that help insurance companies to make the right decisions more quickly in routine cases.

However, in order that the start-up continues to grow, it is essential for Sophia and her team to always remain at the cutting edge of technology. For this purpose she uses the in-house seminars of TÜV Rheinland Academy. Which have the advantage that the information and best practices presented are precisely tailored to the requirements of her company. In addition, the trainers have practical experience and can help with well-founded solutions for almost all questions.

YOUR BENEFITS

TÜV Rheinland Academy seminars provide up-to-date specialist knowledge around the world and can be adapted flexibly in terms of content and scope. Our trainers come from real-life practice. They are familiar with the current challenges and solutions in various industries and specialize in imparting their expertise in an exciting way. In this way, we reliably take key personnel to the next level and secure a decisive competitive advantage for companies. It is also possible to obtain certification according to international standards following the respective training.

SUMMARY

With the founding of an IT start-up, Sophia's big dream became true. In order that her company continues to exist in the future, she proceeds to rely on the current content and exciting teaching methods of TÜV Rheinland Academy.

A real competitive advantage that you can also utilize.

ABOUT TÜV RHEINLAND ACADEMY
