

Sustainability, carbon footprint and CO₂ neutrality

Sustainability	Energy technology	Industrial fittings / SIL
Greenhouse gas inventories & ETS	Energy certification	Eco-design & emission monitoring
Municipal climate protection	Mechanical components	Certification of energy appliances
Energy management	Electrical components	Approval of energy appliances

Carbon footprint – what does it mean?

Human activities cause emissions that contribute to global warming and thus pose a serious threat to everyone. From industry to consumers, everyone is responsible. Accept your responsibility and let us help you calculate your **“carbon footprint”**. We help you to declare real and quantifiable emissions and emission reductions so that you can make a definitive contribution to climate protection.

Control emissions in your company or of your products and events. By performing an emissions check-up you not only gain transparency but can also act more efficiently by identifying the sources of emissions and possible areas of reduction.

Set a good example and demonstrate your awareness of climate issues by not only monitoring and reducing your emissions but also **by becoming climate neutral investing in climate protection projects.**

TÜV Rheinland has many years of experience in this field, as proved by our accreditations from the American National Standards Institutes (ANSI) and the Deutsche Akkreditierungsstelle GmbH (DAkkS).

The experts at TÜV Rheinland perform certifications according to all internationally recognized standards.

Our services. For you.

- Certification of Corporate Carbon Footprint, Product Carbon Footprint, Event Carbon Footprint
- Verification of Corporate Carbon Footprint, Product Carbon Footprint, Event Carbon Footprint
- Certification of compensation measures (climate neutral company, product, event)
- Certification of ecological balance sheets

Carbon Footprint Management – why? Because...

- ... it is an effective quality assurance tool.
- ... it is a reliable representation of increased efficiency.
- ... it increases transparency and the identification of “hot spots”.
- ... it improves your position in the supply chain.
- ... your climate awareness gains credibility.
- ... it is compatible with other certifications and management systems.

You want more. Just ask us.

We are specialists for CO₂ emission monitoring.
We can certify your corporate, event and product carbon footprints.
We verify greenhouse gas reports for companies, products and events.
We are the experts in ecological balance reports.
We advise you in CO₂ risk management and emission reduction strategies.
We are your service provider for emission compensation and climate neutralization for products and companies.

We look forward to hearing from you.

Always a good sign.

This mark stands for all the information about products, services and systems that are tested, certified or inspected by TÜV Rheinland.

Transparent, available anytime world-wide – powerful and unique.
The TÜV Rheinland test mark.
