

Testing of Biodegradable Products

The biodegradability lab in Shanghai built by Leading global technical services provider TÜV Rheinland has been officially put into operation since January 2013. TÜV Rheinland is one of

DIN CERTCO recognised third-party testing organisation in China for testing according to EN 13432 "Packaging - Requirements for packaging recoverable through composting and biodegradation".

DIN CERTCO is a certification organisation run jointly by the TÜV Rheinland Group and the Deutsches Institut für Normung (DIN). This in-depth collaboration aims to provide local manufacturers and exporters with a comprehensive solution for biodegradable product testing and to speed up their access to global markets. Biodegradable products tested by TÜV Rheinland can apply for the internationally recognised Compostable Mark ("Seedling") which is a certification system developed by DIN CERTCO and European Bioplastics e. V.

Our customised service which includes testing, consulting and support on acquiring certification provided by local experts, greatly shorten the lead time. Certificate-holder details can also be queried on the official DIN CERTCO website to prevent misuse or forged labels.

Compostable Mark ("Seedling")

Internationally recognized Compostable Mark ("Seedling") is developed by European Bioplastics e.V.. This quality mark identifies the manufacturer or supplier whose products have undergone an independent and transparent testing and evaluation process.

compostable
