On your mark!  
For safety, quality and sustainability.

Especially where consumers expect it from you – in international markets and sensitive environments.

SUSTAINABILITY
Sustainability means for example to reduce carbon dioxide emissions, to conserve resources and to responsibly use finite raw materials. We are committed to sustainable solutions. Our experts specialize in testing and certifying environmental friendliness and process safety. We assist companies of all kinds in their way to a resource-conserving and cost-effective orientation of their business.

MARKET ACCESS SERVICES
With our expertise in market access services, TÜV Rheinland helps you to enter new markets for your products. Our experts know all market-specific requirements for approval and offer a one-stop service – for fast access to international markets and for a quick launch of your products.

SILVER
Products are marketable only when they are safe and when the end user knows that they are reliable. Insurers insist on measures that ensure product safety as well. To increase your competitiveness, always opt for safety testing by an independent third party institution. So be sure to let us inspect and certify your product or quality management system. Offer your customers assurance of quality and conformity with the globally recognised TÜV Rheinland test mark.

QUALITY
The motto is “safety first”, because safety is the basis for further tests that carefully examine quality attributes such as ergonomics, ease of use, durability, ease of care or low-noise design. These requirements are based on relevant consumer demands and longtime experience in quality testing.

SUSTAINABILITY
Sustainability means for example to reduce carbon dioxide emissions, to conserve resources and to responsibly use finite raw materials. We are committed to sustainable solutions. Our experts specialize in testing and certifying environmental friendliness and process safety. We assist companies of all kinds in their way to a resource-conserving and cost-effective orientation of their business. Whether testing for harmful substances, recyclability, energy efficiency, life cycle analysis or Green Product certification – our services will increase the trust in your products.

pinpointing of defective medical devices.

Therefore it is essential to protect defibrillators, pacemakers and other mobile devices such as tablets and smartphones against potential misuse by unauthorized third parties. As a leading service provider in the area of IT security, we can offer you the complete package: from analysis and optimization up to testing and certification of the information security of your products.

New regulations in the area of medical devices.

In order to gain access to the European market, your products must fulfil the essential requirements.

By offering the CE mark to your medi-

cal devices or in vitro diagnosis you testify to the conformity with Eu-

European rules and standards. Your

test mark helps you throughout the

compliance process.

The new regulations will be in force as of May 2024. In order to prevent this from becoming a cost-intensive challenge for you, we have summarised the key information and changes here:

Increasing use of IT and wireless appli-

cations in the area of medical devices has led to increased risk of cyber attack. This means that the information and data security of a medical device can be severely compromised. In the world today, this can lead to negative impacts on the function, or even total failure. Therefore it is essential to protect defibrillators, pacemakers and other mobile devices against potential misuse by unauthorized third parties.

compliance with regard to safety, quality and suitability. For your product to be successful and for the performance claims to be verified, the product needs to be in compliance with regard to safety, quality and suitability. We understand this. And we take care of it.

The experts from TÜV Rheinland use their extensive technical knowledge to perform tests and certifications. As the leading provider of testing and certification services in the world, we have been assisting our clients with their projects for over 145 years. We stand for safety, quality and efficiency in the interaction of man, technology and environment.

We are always impartial and independent and take regulatory requirements, performance characteristics and consumer needs into account. All this greatly benefits you and your product when you reduce development costs and returns, acquire new target groups, improve customer retention, increase sales and get a faster access to international markets.

Our worldwide network of experts works together with international certifica-

tion bodies and performs tests according to the applicable regulations. Product safety and product quality thus are validated. Comprehensive services, complete industry solutions with individual teams and regular contact persons support you with the development of your product from prototype to market launch. We will help you analyse demands and goals.

Safety services of TÜV Rheinland – because a lot depends on your products.

The safety and quality of medical devices and in vitro diagnostics are of vital importance for patients. And with us, you are in expert hands.

In this innovative market sector, you can take full advantage of our expertise. Within the framework of your conformity assessment process, in future we will examine your CDx product against the requirements of the IVDR. Following successful completion of the assessment, you will be entitled to apply the CE mark to your product.

We know your products, we are close to the market and have all the latest information at hand through our work on committees with experts and official bodies. With us as Notified Body, you will have a competent partner and can feel truly confident.

In the following text, we will take a closer look at the most important test mark ID and QR code, your product can offer the latest one-stop solutions for you and your products. Some of the areas covered by our services are described below:
