

Business Continuity Management at Huawei Technologies

Huawei Technologies, a leading manufacturer of electronic components, has successfully completed the TÜV Rheinland audit process and been awarded the ISO 22301 Business Continuity Management (BCM) certificate. The company plans to strengthen all its locations using BCM.

Basic Facts

| | |
|---------------------------------|---|
| Client | Huawei Technologies |
| Project location | Reading (UK), Ipswich (UK) and Dublin (Ireland) |
| Main services | Certification of the Business Continuity Management System (BCMS) |
| Involved regulations, standards | ISO 22301:2012 |

Initial situation and requirements

Huawei Technologies' customers include large telecommunications companies and public-sector clients. Those customers increasingly require a consistent Business Continuity Management System (BCMS), either because they have such systems in place themselves or because they want to ensure that the infrastructure the company provides is secured. However, Huawei also wanted a BCMS certification from an independent, neutral third party – such as TÜV Rheinland – to confirm the effectiveness of its system.

Huawei's major clients from the telecommunications industry are subject to statutory requirements regarding emergency management. As a service provider, and a company that sells key components to almost all the major telecommunications service providers, Huawei wants to meet the same standards as its customers and demonstrate that commitment by means of a certification.

Solutions, results

Huawei Technologies chose TÜV Rheinland for the certification of its Business Continuity Management System according to ISO 22301. The standard specifies requirements for the planning, implementation, monitoring and continuous improvement of a documented Continuity Management System. It also helps Huawei take preventative measures to avoid disruption of its business operations, to react better in emergencies and to recover from issues.

Benefits for the client:

- Certified business continuity concept in case of serious disruption
- Secured operation of telecommunications services
- Increased confidence on the part of major customers
- Competitive advantage in the tender process
- Compliance with legal requirements

Did you know?

Companies are increasingly choosing certification according to ISO 22301:2012. As well as Huawei, TÜV Rheinland Cert GmbH has successfully certified the BCMS of DZ BANK and Vodafone. The ISO 27001:2013 standard also requires a Business Continuity Management System. Approximately 100 companies are successfully certified according to the standard by TÜV Rheinland.

About TÜV Rheinland

Founded 140 years ago, TÜV Rheinland is a global leader in independent inspection services, ensuring quality and safety for people, the environment, and technology in nearly all aspects of life. We inspect technical equipment, products and services, oversee projects and help to shape processes for companies around the world. Since 2006 we have been a member of the United Nations Global Compact to promote sustainability and combat corruption.

Always a good sign. The TÜV Rheinland test mark.

This mark stands for all the relevant customer information about products, services and systems that are tested, certified or inspected by TÜV Rheinland. This information is available online anytime, anywhere, and can be viewed in a matter of seconds at the click of a button. This means optimal transparency and top performance in terms of safety, quality and reliability – always. Global, systematic and eye-catching – communicated through a unique and multifunctional mark. The TÜV Rheinland test mark.
