

Automotive industry – Quality Management in automotive industry

IATF 16949:2016 Requirements

IATF (International Automotive Task Force), a group composed of representatives of manufacturers and professional organizations producing car parts and subassemblies published on October 3, 2016 the new IATF 16949 Automotive Quality Management standard. This new standard, together with the specific requirements of customers and ISO 9001: 2015, define the quality management system for suppliers in the automotive industry.

The requirements of the IATF 16949: 2016 standard - a fundamental quality standard for automotive production organizations, ancillary services and spare parts, must be implemented and audited together with ISO 9001: 2015 and customer specific requirements.

Objective

Acquiring knowledge relevant to the development of a quality management system that: provides for continuous improvement; emphasizes defect prevention; includes specific requirements and tools in the automotive industry; and promotes the reduction of variation and scrap within the supply chain.

Duration

- 2 days

Target group

Quality department staff, Technical department staff, Top and middle management in Production.

Benefits

The IATF16949 certification has a wide area of recognition of the value of management implemented in organizations

producing automotive components and subassemblies, being recognized globally, it becomes a confirmed competitive advantage. The certification allows you access to the supply chain of the automotive industry and anticipate the evolution of customer requirements, adding value to the quality management implemented in any other organization, being also non-automotive.

Subjects

- IATF 16949:2016 requirements;
- Transition plan from ISO/TS 16949:2009 to IATF 16949:2016;
- Changes brought by the IATF 16949: 2016 standard.

Forms of evaluation

Written test: Grid examination questionnaire.

The participants who pass the exam are awarded Certificates in Romanian language by the Academy & Life Care TÜV Rheinland Romania.
