

TUV Rheinland Carbon Audit Services

TUV Rheinland offers from Hong Kong package services on carbon and energy management to help enterprises in the Greater China region, specifically those in the business of water treatment, real estate, machinery, photovoltaic, IT, building materials, food and medical sector. By joining hands with a group of like-minded and forward thinking leaders in reducing carbon emissions, we offer integrated solutions from different carbon reduction programmes, including the solutions for businesses to participate in different carbon reduction programmes including, Carbon Disclosure Project (CDP), the WWF Low-carbon Office Operation Programme (LOOP), Hong Kong Awards for Environmental Excellence (HKAEE) Carbon Reduction Certificates Scheme and the WWF Low-carbon Manufacturing Programme (LCMP), Taiwan carbon label, etc. To help businesses save on the costs and efforts involved in earning different recognition, we also provide tailor-made services.

WWF Low-carbon Office Operation Programme (LOOP)

- LOOP was established in 2009 to enable companies and organisations to become part of the climate change solution;
- Interested companies may submit their applications by each May, and their LOOP labels will be awarded before December.

WWF Low-carbon Manufacturing Programme (LCMP)

- LCMP helps to measure their effectiveness in reducing carbon emissions and equip them with best practice in greenhouse gas management.
- It is in line with mainland China's national energy saving plan and carbon emissions reduction target.

Hong Kong Awards for Environmental Excellence (HKAEE) Carbon Reduction

- It aims to recognise those buildings or organisations that achieved a verified absolute reduction of overall carbon emissions.
- Provide recognition to participants according to their respective levels of achievements in carbon footprint reduction
