

**TÜV Rheinland and OpenSky Named  
“RSA Archer Suite Partner of the Year”  
for the Consecutive Year  
01/18/2018 | Cologne / Tolland**

TÜV Rheinland and OpenSky, a wholly owned subsidiary of TÜV Rheinland, are thrilled to be selected by RSA as “RSA Archer Suite Partner of the Year” for the second year in a row. The leading providers of Enterprise Risk Consulting, Cybersecurity and Infrastructure Solutions have been awarded for their leading Archer Practice and GRC business, which is part of the whole "Digital Enterprise. Protected" services portfolio.

The companies were honored among a global field of top RSA Archer business partners. “To receive the highest award from RSA Archer two years in a row is especially rewarding because it recognizes our ongoing commitment to offering innovation and delivery excellence of risk-based consulting services,” said Frank Luzsicza, Executive Vice President ICT & Business Solutions at TÜV Rheinland.

TÜV Rheinland and OpenSky are also Strategic Partners in the RSA SecurWorld™ Partner Program, serving multiple geographies. With a significant number of RSA Archer Accredited Professional Consultants, TÜV Rheinland and OpenSky’s RSA Archer Practice can lead large, complex, international projects while achieving high customer satisfaction ratings.

TÜV Rheinland and OpenSky have a long history of

partnering with RSA, helping companies protect their most valuable assets from the inherent cyber and business risks in an increasingly digital world. Helping organizations adopt the new fundamentals of successfully managing technology, prioritize information and technology risk, and build advanced cyber defenses is central to the digital transformation of organizations. Digital transformation is facilitated by RSA Archer's software because the volume, complexity, and frequency at which risk needs to be managed today means it can no longer be done effectively using spreadsheets.

RSA Archer Suite is designed to help organizations take command of the multiple dimensions of Enterprise Risk with solutions built on industry standards and best practices, on one configurable, integrated software platform. TÜV Rheinland and OpenSky have established themselves as leading information technology, cybersecurity, and GRC advisory service providers. Helping customers throughout the United States, United Kingdom, Germany, Austria and Switzerland, TÜV Rheinland and OpenSky have built a strong RSA Archer Practice and delivery methodology implementing solutions successfully since 2010.

TÜV Rheinland is a global leader in independent inspection services, founded nearly 150 years ago. The group maintains a worldwide presence of more than 20,000 people; annual turnover is EUR 2 billion. The independent experts stand for quality and safety for people, technology and the environment in nearly all aspects of life. TÜV Rheinland inspects technical equipment, products and

services, oversees projects, and helps to shape processes and information security for companies. Its experts train people in a wide range of careers and industries. To this end, TÜV Rheinland employs a global network of approved labs, testing and education centers. Since 2006, TÜV Rheinland has been a member of the United Nations Global Compact to promote sustainability and combat corruption.
