Clean Development Mechanism (CDM)

Clean Development Mechanism (CDM) is a flexible mechanism of the Kyoto Protocol, which allows countries with GHG emission reduction commitments to invest in projects reducing greenhouse gases in developing countries. Revenues from Certified Emission Reductions (CER), the equivalent of one tonne of CO2 reduction, can form part of the project’s cash flow.

TÜV Rheinland is an Internationally competent source for solutions in the field of engineering, safety, environment and quality. Our well-qualified and highly experienced team of professionals provides all such services. Our team also comprises of Qualified, Quality auditors.
